

LETTER OF RECOMMENDATION

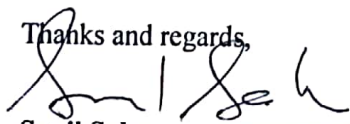

I am elated to write this recommendation supporting Mr Suyash Kanungo's candidature, who wishes to pursue graduate studies from your renowned academic institute. I have known Suyash as a Software Engineer at NCS, Indore who has been working under my supervision in the development team headed by me. NCS a leading Product Development, Custom Software Development, and IT resourcing company. Suyash was selected for our company on the basis of his academics and technical aptitude after an exhaustive recruitment procedure.

Our team, of which Suyash was also a member, is responsible for development of applications for PowerTech live monitoring application. Suyash was of great help in the project, thanks to his efficiency and in-depth knowledge of Java and databases. He was responsible for both UI and also the supporting backend tasks; he simultaneously worked on technologies like JavaScript, spring frameworks, mainly SpringMVC and SpringBatch. His skills in SQL helped him to successfully contribute by supporting DBMS tasks. With an indubitable command on programming in Java, Suyash was quiet comfortable handling other technologies as and when required.

After noticing his hardworking nature, efficiency and enthusiasm Suyash was selected in the team. Besides accomplishing his own target, he would also assist and help peers. Taking new challenges in the assigned projects, Suyash possesses team spirit and excellent interpersonal and problem solving skill. During his stay at NCS, Indore he was able to develop an insight into project handling and dynamics of professional application development. At the same time I came to know his interests in advance topics like Algorithms, machine learning and programming.

In all, Suyash has a great affinity and zest towards learning new technologies and expertizing the existing skills together with his intellectual creativity makes him perfect candidate to pursue an intensive graduate degree. I strongly endorse his candidature and wish him good luck for a bright career.

Thanks and regards,

Sunil Sahu
